Recycle your IT Equipment & Shred your hard drives

## Xpo IT Services:

**Waste Management License:** EAWML 100347

**Authorised Treatment Facility:** (ATF)

**Waste Carriers License:** CB/YN5116NG

## IT Recycling & Data Destruction Specialists Xpo IT Services

## Welcome to Xpo IT Services

With over 10 years experience we are renowned within the industry for recycling Waste Electrical Equipment (WEEE). We are one of the few recycling companies to hold ISO 27001 & ISO 9001.

Increasing legislation means that all IT equipment must be dealt with correctly to standards set out by the WEEE directive. To meet these standards our Environment Agency approved site has the latest shredder for shredding hard drives, tape media and IT equipment. Any company wishing to use these services are more than welcome to witness the shredding. On completion we provide a Certificate of Destruction, as well as a Waste Transfer Note.

We offer a friendly, flexible and fully audited service, together with the option of a percentage rebate on any revenue generated by the resale of the IT equipment we collect from the client.

## Our Accreditation

ISO 27001 (Information Security Management System)  
ISO 9001 (Quality Management System)  
Environment Agency Waste Management Licence

## We are also:

Registered with the Data Protection Registrar  
An Authorised Treatment Facility (ATF) for handling electrical goods.

## Hard Drive Shredding & Data Security

Hard Drive Shredding & Data Security play a major part in our processes. We have a state of the art Hard Drive & Media Shredder that shreds to a high standard, thus ensuring that the Data is completely irretrievable. We also use Blancco Data Cleaner, which is the preferred choice of leading organisations from the Ministry of Defence to Banking organisations around the world, and a Degausser that destroys the hard drives and tape by passing a magnetic field through the unit.

## IT & Telecoms Recycling

We are also a major exponent in the secure and legislation-compliant recycling of various waste streams from TFT/CRT monitors, PC System Boxes, Printers and Laptops to UPS, Servers & Telecoms equipment.
